music center

S2•PADS were put in production and offered to the best American and Japanese flute makers in the year 2009 and then introduced to repair shops and ateliers worldwide. They are manufactured by Music Center spa in its modern factory located in North Italy, well equipped with very special CNC machinery, where skilled workers take care of the manufacturing process starting by an accurate selection among exclusive top quality materials till a final quality control. These newest pads are perfectly shaped, precise, absolutely stable, very flat and give a wonderful sound. S2•PADS are available in two versions: S2•US and S2•HT.

## S2•US

## S2•HT

### THE FINEST DOUBLE BLADDER

Among thousands meters of the best bladder for flute pads, specialized personnel select only the smoothest and strongest material.

### A SPECIAL MICROFIBRE

After continuous research, done in cooperation with customers and suppliers, Music Center found a wonderful microfibre that is used instead of felt in the S2•US pads.

### DELRIN HALF-SHELL

Produced with the highest precision by a newest special CNC lathe, this delrin "cup" was designed with a perfect shape, so that the flute pad is very stable and its surface is perfectly flat.

### CARDBOARD DISC

A cardboard disc, printed with the S2•US logo, is attached under the delrin half shell and over the bladder, as a quality seal on the back of the pad.

### THE FINEST DOUBLE BLADDER

Among thousands meters of the best bladder for flute pads, specialized personnel select only the smoothest and strongest material.

### A SPECIAL HI-TECH FELT

Felt is a basic component of the millions of pads produced every year by Music Center. A very stable synthetic Hi-Tech felt was chosen for the "HT" version of these newest line of untraditional professional flute pads.

### DELRIN HALF-SHELL

Produced with the highest precision by a newest special CNC lathe, this delrin "cup" was designed with a perfect shape, so that the flute pad is very stable and its surface is perfectly flat.

### CARDBOARD DISC

A cardboard disc, printed with the S2•HT logo, is attached under the delrin half shell and over the bladder, as a quality seal on the back of the pad.
